WORK EXPERIENCE

Progyny Inc — Flutter / Dart Developer

May 2025 – Jan. 2026

Contracted through Circle7 Technology

- Developed and maintained a production Flutter application across Web, Android, and iOS.
- Built responsive user interfaces from Figma designs.
- Integrated REST APIs and used BLoC architecture to support scalable state management.
- Worked with backend, Salesforce, design, and product teams in Agile/Scrum workflows.
- Used Jira and Confluence for task tracking, documentation, and team collaboration.
- Diagnosed and resolved bugs, maintained automated tests, and contributed to app stability and performance improvements.

USDA-FSIS — IT Software Dart / Flutter Developer

Apr. 2024 – Apr. 2025

Contracted through NFinity

- Helped convert a legacy website into a Flutter Windows application.
- Collaborated with a team of Flutter and Java developers through pair programming.
- Integrated multiple APIs into the Flutter application.
- Used Drift to run SQL queries against an existing database from within the Flutter app.
- Created dynamic PDFs using application data with the Syncfusion Flutter PDF package.
- Implemented functionality for users to view, save, and download PDFs inside the application.
- Resolved and helped prevent bugs and defects throughout development.
- Communicated technical concerns, feedback, and project updates with project managers, developers, and business analysts.
- **Technologies:** Flutter, Dart, SQL, Azure, DevOps, Agile, Scrum, Java, Git

VSBL App — Flutter Mobile Developer

Feb. 2022 – Jan. 2024

- Developed features for a Flutter iOS and Android application for a startup company.
- Converted Figma designs into functional mobile app screens.
- Created and used data models to support app features.
- Implemented UI/UX solutions and resolved bugs and technical issues.
- Managed app assets and implemented frontend API calls between the app and backend services.
- Worked with tools and technologies including Flutter, Firebase, Git, AWS, MySQL, Jira, Confluence, and Figma.

Promote Indie / Aderoo — Flutter Mobile Developer

May 2021 – Feb. 2022

- Developed a Flutter iOS and Android application for a startup company.
 - Helped build an application that tracks delivery vehicle locations, sends data to cloud storage, and supports statistical analysis.
 - Coded large portions of the app and contributed to UI/UX design.
 - Managed code contributions from other team members.
 - Contributed to background service functionality.
 - **Technologies:** Flutter, Kotlin, Google Cloud Platform, Geolocation API, Git, Firebase Authentication, AWS, PostgreSQL, State Management
-

PROJECTS

STEAMER — Achievement Tracker

Mar. 2026 – Present

- Built and launched STEAMER, a Flutter app on Google Play for tracking Steam profiles, game libraries, playtime, achievements, and backlog progress.
- Built a serverless backend using Cloudflare Workers and Workers KV to aggregate Steam data, cache responses, and improve performance.
- Integrated Google Play Billing and AdMob for monetization, including a one-time Pro unlock, purchase restoration, ad removal, and gated premium features.
- Built features including multi-account support, Friends Compare, watchlists, shareable Player Cards, theme customization, and in-app feedback.
- [Live Play Store Link](#)

Flux Survivor

Feb. 2026 – Present

- Published a real-time arcade roguelite game built with Flutter Flame to the Google Play Store.
- Built gameplay systems including weapons, enemies, bosses, upgrades, achievements, codex progression, and multiple game modes.
- Integrated Firebase cloud save, leaderboards, and Google Play Games sign-in for player progress.
- Incorporated AdMob rewarded ads and configured the Android release pipeline for Play Store deployment.
- Improved long-session performance using pooled combat entities, runtime profiling, and mobile-focused UI, audio, and haptics polish.
- [Live Play Store Link](#)

Foley's One Stop Website

Feb. 2024 – Present

- Built, deployed, and maintained a website for my Dad's small rental business.
- Created functionality for customers to browse available inventory online.
- Built an admin login that allows the business owner to add and update product images, descriptions, pricing, and related details.
- **Technologies:** Flutter, Dart, Firebase Database, Firebase Authentication
